

Within any Hospital setting, SLims helps in digitizing your NGS Diagnostic tests while integrating in an elegant way with your existing infrastructure
 Key LIMS + ELN features of SLims: The easy way to manage the Diagnostic Labs in your Hospital

SLims for Diagnostic Hospital Labs Highlights

- A validated solution for Diagnostic Labs in Hospitals, Biobanks, academic or private settings
- Both ISO 9001:2008 and 21 CFR Part 11 compliant options available
- Compliant with industry standards like HL7, XML, SQL and CSV for a seamless integration with your existing infrastructure
- All functionality needed for your NGS based Diagnostics provided by one single platform
- The platform easily links to your existing patient information system, invoicing system or pathology platform

Why use SLims for Diagnostics ?

If the Diagnostic Labs in your Hospital are looking into the implementation of Next Generation Sequencing (NGS), then have a look at what SLims can offer

You get full support for all major NGS platforms available on the market within a comprehensive environment able to support ordering tests to final data integration. SLims has full auditing and chain-of-custody features to ensure your Diagnostic Laboratory operates meets total compliance!

We realize that not all of the existing tests are NGS based, and that means all of your other existing tests and workflows can be fully supported in our system!

We offer a very elegant way to integrate SLims within your current organization thanks to its full compatibility with existing industry standards, including (but not limited to) HL7, XML, SQL and CSV!!

About Genohm

Genohm is a Swiss company with offices in Lausanne (Switzerland), Ghent (Belgium) and in Durham, NC (USA). The company has developed SLims, a laboratory software automation suite. SLims provides laboratories with one integrated LIMS + ELN environment that tracks data and samples from the original sample shipment down to the result from lab machines and in-silico analysis pipelines. It fully accommodates the needs of any research lab, NGS lab, service facility, Biobank or QC lab.
